## **ESL VISION RELOCATES AND EXPANDS OPERATIONS**

**Salt Lake City, UT – October 17, 2017** – ESL Vision, a provider of LED lighting solutions announces the relocation of its corporate headquarters in Salt Lake City, UT. The move allows ESL Vision to expand its growing assembly operations and provides a larger warehouse for expanding product lines.

"Delivering the best possible solutions and experiences to electrical distributors has always been the driving force of our culture at ESL Vision. This relocation enhances our ability to keep doing just that. Furthermore, it ensures these core values will remain firmly intact, regardless of how large our company has become," commented Jeff Provolt, ESL Vision Director of Operations and Founding Partner.

Managing Director and Founding Partner, Michael Gleeson, adds "By more than tripling our space we now have more room to expand our assembly lines, allowing us to turn-around delivery times of our growing product offering at a faster pace. Additionally, the new expanded office space gives engineering and marketing more capabilities to help provide better service to our customers."

The new warehouse includes time and space-saving rack systems, enhanced assembly equipment and processes, and several additional vehicle bays with closer proximity to transportation providers and Interstate access. The new contemporary offices were designed around customer interaction which feature advanced conferencing and collaboration capabilities, complete with customer-centric training and education facilities.

ESL Vision's new address is **1136 S 3600 W, Salt Lake City, UT 84104**. The company's main phone number will remain the same – **888-493-5559** – as will all employee direct lines and email addresses.

### **About ESL Vision**

Combining years of solid-state lighting design experience, a patented installation approach and a unique focus on electricians and supply houses, ESL Vision manufactures and offers a complete range of innovative and efficient LED lighting solutions for virtually any retrofit, replacement or new lighting project. ESL's solutions deliver time and money savings by eliminating many of the hassles of installation, by reducing energy costs, and by qualifying end users for various utility company rebates and incentives. Available through electrical supply and distribution partners, ESL Vision provides lighting products and systems that surpass today's industry demands, while developing tomorrow's solutions.
