

How to use TAP

USB

WAND

- Using a PC laptop or computer, simply plug in the USB stick and download the TAP software.

Click 'YES'

- Once the software is downloaded, open the ESL Vision App by clicking the icon. A screen will appear blank.

- Plug the TAP Wand into the computers USB port.

- Hold the wand over the TAP indicator on the fixture and click READ.

- The default wattage and kelvin will appear.

- To change the settings, select the desired Wattage and Kelvin.

- Click WRITE. Your fixture is ready to go!
