

WARNING

1. To avoid electric shock, disconnect power at source prior to installation.
2. The installation should be performed by qualified electricians or lighting technicians.
3. Before conducting any installation, maintenance, or removal, disable all power.
4. Do not touch the fixture while it is in service.
5. If there is any problem with the fixture, turn off power and **DO NOT** attempt repair unless you are a qualified technician or the customer service member.

Surface Mounting Installation

- 1** Using the switch on the back, select the desired kelvin.

- 2** Attach the bracket onto the junction box with the screws provided.

- 3** Attach steel safety wire onto bracket.

- 4** Connect the power to the fixture as shown in the wiring diagram.

- 5** Align the spring with the bracket hole and press into place.

- 6** Ensure that the fixture is flush with the surface to complete the installation. For use in wet location please caulk edges of the fixture to create a seal with ceiling.
